

“Millionaire for Life 5/58 + 1/5”

GAME DESCRIPTION AND OTHER CONSIDERATIONS

Issue Date: April 24, 2025

Game Start Date – mid-February 2026; First Draw TBD.

Sales in the game will start mid-February 2026. The first draw will be TBD.

Game Description

The National for Life 5/58 + 1/5 is a draw-based lottery game with a set Grand Prize and eight set prize levels. The Match 5 + 1 prize will be an annuity prize of \$1,000,000 a year for life. The Match 5 prize will be an annuity prize of \$100,000 a year for life. The remaining six prize tiers are set cash prizes. **Drawings will be held daily after 10:00 p.m. Central Time.** The game play sales will close for each draw no later than 9:00 p.m. Central Time. The winning numbers will be selected randomly using Digital Draw Systems. A sample play could be 01-02-21-04-30-04.

Game Play

Players will use play slips or enter manual plays or “computer picks” through a retail clerk, a player-operated terminal or web or mobile based application, if available in the jurisdiction, or through ticketless transactions such as subscription purchases as authorized by the jurisdiction, to select five different numbers from a field of 58 and one number from a field of 5 for each drawing. The number from the field of 5 can duplicate one of the numbers chosen from the field of 58, as in the prior example.

Grand Prize (Match 5 + 1) winners or Match 5 winners will have the option of selecting either a lump sum cash payment or the lifetime annuity option. No selection need be made at the time of purchase, or the system can default to annuity to permit the player to make their choice after a win. All other prizes will be paid in cash. A single play will cost \$5 including sales tax where mandated.

Conduct of Drawings

The drawing will be performed by MUSL and will use Digital Draw Systems to draw five numbers out of 58 and one number out of 5, respectively. The drawings will not be broadcast but may be available on the Internet. The drawings will be held daily at no earlier than 59 minutes after the close of the game play sales.

Matches, Probabilities, and Prize Amounts

The Grand Prize shall be determined on a pari-mutuel basis. In certain circumstances (see Other Considerations) the Tier 2 prize may become pari-mutuel. Other prizes are set out below.

Number of Matches Per Ticket	Probability Distribution	Probable/Set Prize Amount
All five (5) of first set plus one (1) of second set	22,910,580.000000	\$1,000,000/yr for Life
All five (5) of first set and none of second set	5,727,645.333333	\$100,000/yr for Life
Any four (4) of first set plus one (1) of second set	86,455.018868	\$7,500
Any four (4) of first set and none of second set	21,613.754717	\$500
Any three (3) of first set plus one (1) of second set	1,662.596517	\$250
Any three (3) of first set and none of second set	415.649129	\$50
Any two (2) of first set plus one (1) of second set	97.799795	\$25
Any one (1) of first set plus one (1) of second set	24.449949	\$8
None of first set plus one (1) of second set	15.647967	\$8
Overall odds	8.467665	

Other Considerations

Grand Prize*. The Grand Prize (Match 5 + 1) shall be annuitized and based on a Grand Prize liability that will be split equally among the number of winning Game Tickets. A Grand Prize winner may request the Cash Option, the amount of which is to be established by the Product Group.

- a. One (1) Grand Prize Winner. If there is one (1) Grand Prize Winner, the annuitized prize value will be one million dollars (\$1,000,000) per year for life. As an alternative to the Annuitized Payment Option, the Grand Prize Winner may request the Grand Prize Cash Option in the amount as established by the Product Group.
- b. Two (2) to Twenty (20) Grand Prize Winners. If there are between two (2) and twenty (20) Grand Prize Winners, the Annuitized Payment Option, based on an annuitized prize value of one million dollars (\$1,000,000) per year, will be divided by the total number of Grand Prize Winners. The minimum annuitized prize value for this category will be fifty thousand dollars (\$50,000) per year for life. Any of these two (2) to twenty (20) Grand Prize Winners may choose the Cash Option as an alternative to the Annuitized Payment Option. The amount of the Cash Option for this category will be the amount of the Grand Prize Cash Option as established by the Product Group divided by the number of Grand Prize Winners.
- c. Twenty-one (21) or more Grand Prize Winners. If there are twenty-one (21) or more Grand Prize Winners, the Grand Prize liability shall be capped at an amount as determined by the Product Group, shall be split equally among all Grand Prize Winners, and shall be paid in one (1) Lump Sum Cash Payment, without an Annuitized Payment Option. The minimum prize value for this category shall not be less than any lower tier prize paid in that respective drawing.

Tier 2 Prize*. The Match 5 prize (Tier 2) Winner will be paid one hundred thousand dollars (\$100,000) a year for life. A Tier 2 prize Winner may request the Cash Option, the amount of which is to be established by the Product Group.

- a. One (1) to Twenty (20) Tier 2 winners. If there are between one (1) Tier 2 Winner and twenty (20), the annuitized prize value will be one hundred thousand dollars (\$100,000) per year for life. Any of these two (2) to twenty (20) Tier 2 Prize Winners may choose the Cash Option as an alternative to the Annuitized Payment Option. The amount of the Cash Option for this category will be the amount of the Tier 2 Prize Cash Option as established by the Product Group.
- b. Twenty-one (21) or more Tier 2 Winners. If there are twenty (21) or more Tier 2 Prize Winners, the Tier 2 Prize liability shall be capped at an amount as determined by the Product Group, shall be split equally among all Tier 2 Prize Winners, and shall be paid in one (1) Lump Sum Cash Payment, without an Annuitized Payment Option.

The minimum prize value for this category shall not be less than any lower tier prize paid in that respective drawing.

**See complete Game Rules for exceptions, Grand Prize and Tier 2 Prize calculation procedures.*

Play Slips. Play slips must provide players with the means to mark any five numbers (01 through 58) for the first set and any one number (01 through 5) for the second set. Multiple Panel Play Slips may be used at the option of the lottery. Plays slips may also provide options for future plays, voided plays, and computer picks.

Printed Tickets. The printed ticket provided to the player must contain the numbers selected. The first five numbers must appear in numerical order. The single number from the second set of 5 numbers must appear last. For example, a player may select for the first set of numbers: 17, 08, 13, 16, and 05; for the second set: 05. The ticket must show the selected numbers in a manner similar to any of the following or by a display acceptable to the lottery:

05 08 13 16 17 — 05

The printed ticket must also display the drawing date or draw date range in the event of a multi-draw or future play purchase, the system numbers, a computer pick designation, and any other information required by the lottery.

Displays of Winning Numbers. All displays of winning numbers controlled by the gaming system, including electronic screens and printed reports must show the numbers as selected within each number universe.

System Record. The vendor central gaming system must record and report the numbers selected, the method of selection (such as play slip, computer pick, subscription, etc.), the retailer, the time and date, and any other information required by the lottery.

Payment of Pari-Mutuel Prizes. All prizes except the \$1,000,000 a year for life Grand Prize and the \$100,000/year for life Match 5 prize are set prize levels. However, the set prize amounts may be changed in certain rare instances as provided in the game rules. The gaming system must be capable of changing any of the set prize amounts for any prize level, rounded to the nearest dollar, as may be announced after the drawing is held and all systems have completed their processing of the numbers of winners by category.

Multi-Draws and Future Plays. Maximum number of consecutive drawings on a single play (board) purchase is ninety (90), except for a ticketless transaction where the selling lottery has a process in place to allow players to make changes to their play (boards) in the event of a game change. For ticketless transactions, the maximum number of consecutive drawings on a single

play purchase is 365, when the Selling Lottery has a process in place to allow players to make changes to their Play purchases in the event of a game change.

Cancellation. Cancellation of plays that have been recorded on the computer gaming system is not permitted.

Sales Cut-Off. Sales for a particular drawing may be cut-off on the day of the drawing. Sales must be cut off at least 59 minutes before draw time. Draw time will be no earlier than 10:00 p.m. Central Time.

Balance Before Draw. A balanced sales report between the central gaming system (CGS) and the Lottery's internal control system (ICS) must exist before the draw. If a Lottery cannot derive a balanced sales report by at least 30 minutes before the draw, the member Lottery should begin out-of-balance procedures.

Ticket Cashing. Lotteries may cash winning tickets after the draw, on the same day of the draw, after all lotteries have reported that their systems are in balance and have reported their prize liabilities. Ticket cashing is expected to occur within two hours of the draw time. All prize levels are eligible for ticket cashing on the day of the draw. Ticket cashing will begin after a lottery is notified of the amount of the prizes at all prize levels.

Cash 4 Life/Lucky for Life. It is anticipated that the National for Life product will replace the existing Cash 4 Life and Lucky for Life products in jurisdictions that currently offer one or the other.
